Chapter 09-   Optimizing our App

Theory Assignment:

- When and why do we need lazy()?

- What is suspense?

- Why we got this error : A component suspended while responding to synchronous input. This will cause the UI to be replaced with a loading indicator. To fix, updates that suspend should be wrapped with startTransition? How does suspense fix this error?

- Advantages and disadvantages of using this code splitting pattern?

- When do we and why do we need suspense?

Coding Assignment :

- Create your custom hooks

- Try out lazy and suspense

- Make your code clean.
